Tachyons are faster than light quantum particles that carry source energy, the source of all frequencies. They contain all the information for the creation and renewal of matter for unlimited vitality, health and creativity. Tachyon energy is unbounded and capable of passing through solid matter with no loss of intensity. It can regenerate and repair itself indefinitely. It has the capacity to carry information at a distance without decay. Tachyon implants its signature onto solid objects. This healing modality is particularly useful to those engaged in information medicine. Tachyon energy will clear and redirect your body's information super highway.
